

Technical Data Sheet

Installation of the Bennington Baffle Support

Part # 5350-080

Date: 5/28/2004

You Will Need:

(1) #5350-080 Baffle Support

Tools Required:

None

BEFORE YOU BEGIN: Work on a cool stove.

PROCEDURE:

- 1) Place the **Stainless Steel Baffle Support** back into the Bennington.

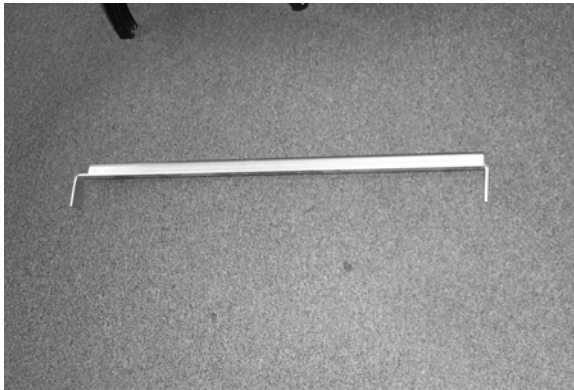

Figure 1
The Baffle Support

- 2) Carefully lift the ceramic baffle off the burner tubes approximately one inch. (Be very careful, the ceramic board is fragile after the stove is burned).
- 3) Place the **Stainless Steel Baffle Support** over the first burner tube and under the ceramic board, with the tab sliding down behind the tube. (The two outer tabs on the **SS Baffle Support** will point forward and rest on grooves in the side casting).
