

# Technical Data Sheet

## Installation of the Tucson Expansion Rings *Used For B-Vent Tucson Manufactured Before 1999*

**Date:** 1/2/2003

**Page:** 1 of 1

### **KIT CONTENTS:**

Expansion Ring

### **TOOLS REQUIRED:**

None

**NOTE:** Use of the enclosed expansion ring allows for a better fit between the flue collar and 4" B-1 vent pipe.

### **PROCEDURE:**

1. Remove the ring from the envelope and place it over the flue collar on the back of the stove.

**IMPORTANT:** Do not pry apart the expansion ring; it should fit snugly over the flue collar.

Installation of the expansion ring is now complete. When installing B-1 vent pipe, place the vent pipe over the expansion ring. It should make a snug fit. With the pipe in place over the expansion ring and flue collar, drill through all three pieces and secure with 3 sheet metal screws.
