

Technical Data Sheet

Tula 8190 Door Handle Replacement

Parts Required:

(1) 5190-020 Front Door Handle

TOOLS REQUIRED:

Metric Allen Wrench Set

Before You Begin: Work on a cool stove.

Procedure:

- 1) Open the front door, to expose the door latch screw. Using an Allen wrench, remove the screw shown in Figure 1. Save the screw for reuse.

Figure 1.

- 2) Remove the Allen screw from the handle, as shown in figure 2. Save the screw/washers for reuse.

Figure 2.

- 3) Slide the broken handle out of the door. Slide the new handle into to the door.
- 4) Reinstall the bolt and washers that we removed during step 2.

- 5) Reinstall the small screw on the side of the door, that you removed in step 1.
- 6) Test the door for a positive connection with the catch, and a proper seal.
