## H-I Bottom Heat Shield Installation Instructions *Assembly #91-57101*

### **ASSEMBLY CONTENTS:**

- 1 - Bottom Heat Shield
- 4 – Bottom Heat Shield Legs

### **TOOLS REQUIRED:**

Flat Screwdriver

### **PROCEDURE:**

1. You will notice that the bottom heat shield has slots cut in each of the four corners. Slide one of the heat shield legs into each of the slots. Pry the slots open with the flat screwdriver if the clip will not fit into the slot.
2. To complete the installation, slide the assembled heat shield under the stove with the feet down. The shield will simply be freestanding under the stove to provide an air space between the stove and the hearth pad for cooling.
