

## Technical Data Sheet

### Green Mountain 40, 60 & 80 Lower Primary Air Opening Kit

*Assembly 96-88000*

#### INCLUDED IN KIT:

(1) Lower Primary Air Opening (LPAO) w/gasket preinstalled

#### TOOLS REQUIRED:

5/32" Hex Wrench  
Ash vacuum

#### INSTRUCTIONS:

**Before you begin:** *Always work on a cool stove!!!!*

- 1) Open the front door of the stove and vacuum the firebox clean. Use ONLY an ember rated ash vac with non-combustible hose, filter and body. Pay special attention to the area of the firebox directly around the primary air opening at the bottom center of the door opening.

- 2) From inside the firebox, using the 5/32" hex driver insert through the air opening to nest with the attachment screw on the back inside wall of the LPAO and remove the screw.

- 3) Gently grab the LPAO at the top with your finger and pry into the firebox at an angle. The OEM unit will have two rows of gasket rope looped over the top (removed in this picture).

- 4) Place the new LPAO into the hole in the bottom casting bottom first and push into place flush against the primary casting.
- 5) Reinstall the mounting screw and tighten.
