

Technical Data Sheet

Lincoln 8060 Rear Heatshield Installation *Assembly 90-68601*

INCLUDED IN KIT:

(1) 5960-010 Rear Heat Shield

TOOLS REQUIRED:

Phillips Screw Driver

Before You Begin: Only work on a cool stove.

1. Locate and remove the two rear-most phillips screws securing the bottom shield to the stove

2. Install the rear heat shield by hooking the top edge of the heat shield under the top rim of cast iron. Line up the two holes in the bottom flange of the heat shield and reinstall the two previously removed screws to secure the shield in place.
